

BIRTH OF THE FEDERAL RESERVE SYSTEM OF BANKING

FOR THOSE WHO MIGHT BE INTERESTED, IN A SINGLE PDF FILE, THE EXCEPTIONAL HISTORICAL RECONSTRUCTION OF GIAN PAUL PUCCIARELLI (PRASSARD), THE GREAT DECEPTION

WRITTEN ORIGINALLY IN ITALIAN
AS
IL GRANDE IGANNO

The Italian Version is available by visiting www.Benito-Mussolini.com

The Following English Google Translation is the best Google can offer translating 36 pages from the original Italian document.

THE GREAT DECEPTION

Although an English reading may and will offer many language flaws throughout the entire document to any reader the Intellectual fruits of Signore Gian Paul Pucciarelli's extensive research and conclusions concerned with the corrupt financial dealings of the birth of the Federal Reserve System and its influence on the financial markets of the world and of paramount importance to a proper understanding of the currency and gold underlying causations for the two major World Wars of the past Century-

Of Prassard (Gian Paul Pucciarelli)
Oberammergau, the Bavarian town tidy

In December 1954. Guido Roeder, graphic arts enthusiast, kept in a basement Linotype old with whom he enjoys pretty print calendars. In the short-run and traditional format, the pages of the twelve months reproduced on coated paper alpine scenery and the frescoes of the houses Bavarian, carrying messages of optimism for the year is about to be born and wishes for better luck for the future Germany.

The center-right Konrad Adenauer continues to administer the FRG under the auspices of the occupation government, while the German mark is rival, despite Wall Street, where, however, are known in the medium-term prospects of Marshall Plan, the most extensive and far-reaching influence.

Guido Roeder has a good reputation in town (his calendars are all the rage). Even if some bored him done in April last page number on which you can admire splendid views of Berteschgaden and "Nest", where Adolf Hitler spent the weekend in the company of Eva Braun, was designed and scrutinized burnt, over the tops of the 2000, the mirage of swastikas, scattered all over the world. The Bavarian printer is still excited, because sales of the calendars has put together a small nest egg, thanks to which it begins to print 10,000 copies at its own expense a book, which not only the audience will find interesting in Bavaria.

The first copies hot off the press are distributed in libraries and in the rest of Oberammergau the region. Some think that a book sold in free Germany in the province and the message of content (truth or lie that is) have the time to propose to the attention of the public and critical. But it is not. Some days passed and armored vehicles of the occupation forces disrupt the streets of Oberammergau quiet, converge towards the basement of Roeder and surround siege. By few months the RFA will join NATO, but the gloomy forebodings of the Morgenthau plan seem new in the air.

An officer with a lot of helmet, without explanation, it queries the printer:

"How many copies of the book and where are they?"

Roeder pales, blabbering dozens of times "varum?" Without answer.

Soldiers in camouflage load copies of the book on two trucks.

Roeder signs a statement that there exist other specimens, while a team of forces of the Military Police undertakes to destroy, to hammer blows, the layout and the matrices old "Linotype". To receive copies quickly and present in the library dispose of the seizure thinks a judge, whose name says it all Program: Izrael Katz.

The title of the book (in German), perhaps enough to explain the reasons for all the

commotion? "Die Geheimnisse der Federal Reserve" ("The Secrets of the Federal Reserve"). [Or, to be clear today: how to legitimately pursue self-interest Total expenditure and to the detriment of public affairs]

The reason which would justify the measure + is as follows: the content the book is clearly anti-Semitic and in contrast to a law of West Germany that prohibits any expression, verbal or written, of racial prejudice.

Roeder to the rescue and protection of their work, the author intervenes from Washington "Manuscript", Eustace Mullins, who submits an application to the Federal German Government and calls on the release from seizure of the book, arguing that in it there is nothing anti-Jewish. But in vain. Mullins insists. Judge Katz replied, stating that the Court of West Germany is jurisdiction to judge the case, since the seizure of the book would have been performed by applying a Government under occupation. Mullins will therefore appeal to the Government of the United States, who, when asked, respond that West Germany has regained autonomy and freedom (of information?) since 1953.

Interesting!

A "runaround" (to use the term Mullins), disrespectful and certainly not enlightening.

But the story does not end here; to end it will be the fire "cleansing".

The story of Oberammergau in fact ends up at the stake.

A few years later, in Monaco of Bavaria, 10,000 copies of "Die Geheimnisse der Federal Reserve ", sequestrated, it was dead. He instructs that John Otto, an official of Federal Government, the running order of the court Izrael Katz, who in turn follows the suggestions of the ADL, the Anti-Defamation League, an affiliate of the Zionist World Organization.

Heinrich Heine, decadent poet of transition Germanic, wrote that

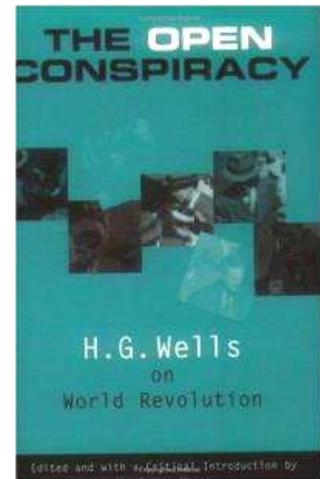

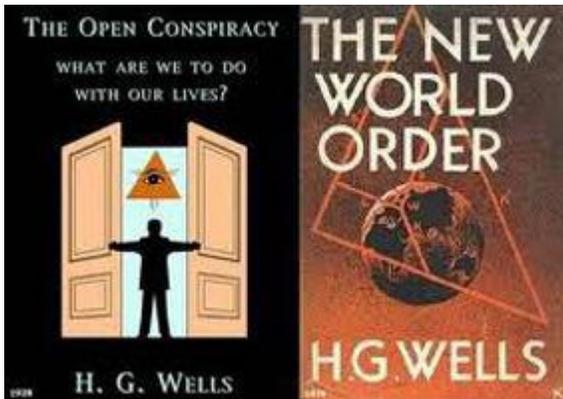

"Wherever they burn books will eventually also burn people."

Oft-quoted aphorism, after the great fire dell'Operaplatz of Berlin, where May 10, 1933, Goebbels advised Hitler to burn piles of books, sending smoke into the German culture.

In 1961 in Monaco of Bavaria burns Mullins's book, but nobody knows.

"The Secrets of the Federal Reserve" ... remain secret. Until 1983, when the Bridger House Carson City Public publish a few thousand copies of an updated edition.

Times have changed? Maybe.

So at least he would think of Lyndon B. Johnson in '66, when he signed the Freedom of Information Act (FOIA aliases), Freedom of Information Act, intended, as we shall see, to make so that the mystery of flying saucers remain so.

Later we will confirm (but there was no need?) That alchemy of George Soros is an economic perfect reflection of that policy, usually practiced by the "Minority Serious" (see "Open Conspiracy "by HG Wells), to control the " New York Times ", " Washington Post "and the degree of acidity of the ink Americans (too low to support the lies of the Warren Report). Today a single copy of "The Secrets of The Federal Reserve "can only be achieved on ... order (try it!). However, also today, the entire text (English) is available for download from the Internet!

There has still never been an issue of an Italian book of Mullins.

Because in our country a prudence Convention spare us the stench of burning?

Or why our "Internet users" the secrets of the Federal Reserve interest until at some point? I wonder if the left equation of Heine (updated version) is still tragically present?

EUSTACE MULLINS AND THE SECRETS OF THE POET

Eustace Mullins has a respectable job at the Library of Congress, to a degree Washington University and a keen interest in European avant-garde of the early twentieth century. The attract paintings of Picasso and Kandinsky, and Modernism in general. The Library of Congress is the world's largest (twenty eight million volumes). Monumental compendium of the entire human knowledge and (with some discomfort) assorted sample crisis and cultural splendors occideale. The latter may include a simple

library ambiguities and contradictions, barely hidden under the weight of neoclassical architecture, the liberal tradition and memory of a president.

The Jefferson Building impressive, indeed. And all that's inside.

Location: 101 Independence Avenue - Washington - DC, a few minutes walk from the White House, half an hour by bus and two centuries of obscurantism futile escape to reach the 1100 Alabama Avenue and the ... "Cuckoo's Nest."

The history of mental hospitals, it is true or false, leaving concrete traces of archetypes. One of these is on a slight hill, south-east, near the confluence of the Potomac to the Anacostia. The point where they stop for migratory birds in search of the proper course and fail ... nest. Eighty feet high, late-Gothic lines and not a sign of austerity after the horrors, the overlapping many pieces of the American dream, so that it indicates a sinister building. (The inspiration is Milos Foreman that twenty-five years later, it will attempt to explain the use of psychiatric treatment in the States, with good support of Upjohns, Roche and Multinational benzodiazepine). Official name: St. Elizabeths Hospital.

Because of well-known inaccuracies in distinguishing the individual from the collective madness, the signs indicators at the entrance of the hospital shall not bear the words "Mental Health". Also because it is no well known you know that among the 8,000 "guests" of the Hospital are selected "Forensic Patients" by submit to the tests of lobotomy. The Civils "benefit" instead of ... Electroconvulsive therapy daily. The visits to the patients are not granted easily. Because of the stench of urine mixed with secular hypochlorous acid vapor, and fainting due to pulmonary complications. Then why have they not so far off the time when Mr. Donovan, the former Chief of 'OSS inaugurated at St. Elizabeth the use of scopolamine to make it the truth serum.

Alabama Avenue in the complex of buildings are preserved in formaldehyde, and 1,400 human brains rumor has it that there is also the end of Mussolini (considered of social interest and useful one day who wished to examine the cells of the Head of Fascism for educational purposes, measuring the effect irrationality of the masses on the lobes of the brain Duce).

Eustace Mullins has just crossed the gates of St. Elizabeth, after having obtained the "steps" and not until you have emptied your bladder. Among the many amenities, recently learned, while walks along the road that crosses a large meadow to the main

entrance, feels the irrepressible urge to sink a hand in his pants pocket to the buttons repeatedly testicles. Saving gesture, but disrespectful to the proximity of Mrs. Dorothy, though sad and pensive, goes with him, side by side. Shortly after, prey emotion and touch wood, Mullins looks around warily, sensing invisible presence of ghosts in uniform.

They are the ghosts of the 500 Soldiers Blue (and Grey) buried in the surrounding area, civil war victims and forgetting. Their poor remains lie scattered in the ground forever, while unaware lawn, the lawn ordering above them without any sign gravestone, continue to delete the memory. Mullins seems to hear cries for revenge, choked meters of land and annoying hum cutting machines. But it is only an impression. He can only hint of a smile, on which juts a thread of lingering bitterness.

The sign appears Mental Health Department. Before crossing the entrance, the "visitor" looks at the Potomac far away and almost motionless, which seems to rise up the noise of battles ninety years ago. The illusion sound stops, because of the voices, almost unreal, coming from within. Mullins, barely controlling his emotion, Mrs. Dorothy, who relies on the goes to the room of a famous "guest" of the department: Ezra Pound.

Outside, the structural-functionalism to Talcott Parsons offers respite to social conflict, solidarity with imposter known which provides for "Open Society" without the use of flyers. It takes the glare of wealth and the habit of invisible multipliers of public debt. The cell of St. Elizabeth in which "houses" Pound is occupied by a bed and a foul-smelling metal table on which are piled notebooks. The small space allows the cell to host the only inmate, such as the treatment of victims of modern Inquisition. Although Mrs. Dorothy tries to reassure Mullins, makes him the street soon tempted to conclude the visit with a quick, liberating leave, even before any with presentations. The environment is impressive. The poet, moreover, disinclined to pleasantries, except those absolutely rite, after a brief exchange of words, does not seem inclined to talk. Long silences, interrupted by brief questions about the health of the prisoner, remain unanswered, with obvious embarrassment of Mullins, who often turns his gaze to Mrs. Dorothy, while the Pound's eyes, half hidden by bleary eyebrows, stare at him earnestly. "She has gone to war?" Asks the poet. And the question reduces the embarrassment of the librarian, but however, increases the sweating body. "Yes. I served in the U.S. Army, and in 1945 I was part of the Occupation Forces in Bavaria.

"" Did you ever wonder why? "" How? "" Why ? "

"Because I have served my country."

"No. No. Have you ever wondered why the war broke out?" Mullins pales.

"Have you ever wondered what are the enormous, deep craters of Hiroshima, and excavated modeled in the hot summer of 1945?" "Do you know what the Federal Reserve Bank?" "The Central Bank of the United States." "Not exactly.

And the head of the First and Second World War! "

Mullins listens stunned.

In the language used the word Pound's wear, which means International Loan System, a network of organized by the Investment Banking loans from the government, which has the right to mediation on each international exchange. The memory of a past more recent, but indelible, clear, imperious and unpleasant, quickly composing images that overlap to remember injuries incurable, imposed in the depths of the soul.

Different times and places evoke the long stay in Europe and the pitch of the exile, lilted rhythms poems of Cavalcanti and Dante, to translate into the language, enlightening and exhausting of the Cantos.

Paris and Italy the Beautiful Lady, repeatedly raped and injured. Venice, the Riviera. The year 1945 is crucial. In addition to the arrest of an American citizen "traitor" who dared to denounce those responsible for two world wars, is reported near Lake Como, the presence of a British obese with an ear to listen to more and more faint echo, dispersed in a vacuum, until firm pressure of a foreign military boots, a toast of appreciation to celebrate the death of Radio Rome and the triumph of the God of War.

A retrospective analysis is essential, says the poet, not to convince those who trades freedom with myopia, but ... see clearly. The surprise is not missing, says that when Pound that occasion the agenda of Winston Churchill was not worth less than the diaries of Mussolini and a brown briefcase containing incriminating papers. The British prime minister used to write down important dates, using the red pencil, such as "Yalta - February 4, 1945."

Dresden preferred the color blue, reminiscent of phosphorous bombs, drawing up his own hand the notes on what would happen in eleven days after the German city. Why did the Bretton Woods economic conference took place a month after the landing

in Normandy? A directive of the "War Production Board", or a precise order of the "Pool" of Banks Who funded the international armaments industry? Those who had wanted the war, maneuvering cunningly "behind the scenes"? Those who claimed control of world finance? Mullins is impressed. Pound continues ...

Province of Como, and around Giulino Mezzegra - April 28, 1945

The same gentleman overweight, bald and wearing a dark suit, the red and blue pencil in the pocket, ready to writing dates and places, and draw a nice "X" cross over a big name, too inconvenient.

What does this man, when the Allies were fighting at the gates and the CLN "his" war retaliation? He paints watercolors mediocre on the banks of the lake.

Artistic creations to attend a short distance his careful guardians, agents of the Secret Operations Executive (SOE).

Among the dead, who within hours will hang upside down in Piazzale Loreto, there is also the man who wanted to defend himself and he knew too much.

The Lord obese, wearing a dark suit, who does not know the misfortunes of Mani, the heretic, or the horrible end of Dionysus, the Paraclete, or Comforter, twice crucified, track two "X" in red on that name and resume mucking watercolors.

Ringling in the ears of the first seven verses of Canto 74 Pisano, (written on toilet paper, in an animal cage, exposed to the elements in the open countryside).

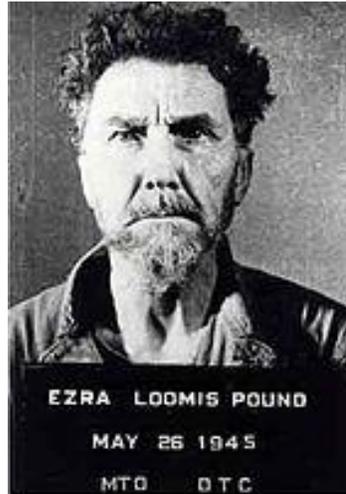

There we learn that the death sentence could anyone recommend the "money maturity" of Silvio Gesell, the monetary theories of Major Douglas and dares to curse the "putrid" and the gold standard Usurious bankers. But the windy street in Washington, where they open the portals of the Supreme Court comes the echo of the sentence, the voice of a stern judge who is preparing to declare insanity mental. The "crazy" man would have done well in a cage to show the torments of the century and the short great deception, that the world would have been a victim, without the need to seek confirmation from the notes of Winston Churchill.* In America, meanwhile, is already tend to grow ondaggi optimism, while the actual life continues between uncertainty and fears.

For another, no longer believes the randomness of what happens in politics. Neither the estimates confirm the prevalence of "accidental" about "conspiracy". But those who feel he could then deny the late President, Franklin Delano Roosevelt, a prominent piece of Wall Street, and what he would have told his ambassador in London, Joseph (Joe) Kennedy: "In politics nothing happens by chance, it happens if you bet it was May Planned That Way "?

In the great country of freedom while you live the age of anxiety, suffered for centuries

and planned for decades to come. "The Age of Anxiety" is, among other things, a poem hot off the press, earning the Pulitzer Prize, the good reputation W.H. Auden and creates many misunderstandings in American society after the war, more prone to swallow anti-anxiety than reading verses (ignoring that roads often lead to madness asylum).

Pound takes his leave,

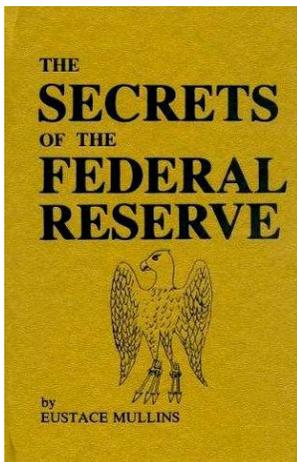

Pound Arrested In Italy

Mrs. Dorothy praying to accompany the visitor exit. At parting, a \$ 10 ticket reaches out to Mullins and gladly accepted. Reimbursement Weekly expenses to carry out a small survey Where?

The Library of Congress, of course. know about Vreeland- Aland much more. For example, what happened in a train station in New Jersey during an autumn evening in 1910. Meanwhile, the librarian accepts the task that will cost, immediately after, the workplace

JEKYLL ISLAND AND THE GREAT DECEPTION

A Railway station in Hoboken, New Jersey-November 22, 1910. Wet and cold autumn evening. A special train is leaving. Unknown destination. Travelers can be counted on the fingers of one hand, but the entire train is reserved for them. Will take place a senator, a representative of the federal government and four exponents of American and international finance:

Paul Warburg, smart banker in Frankfurt, organizer of the secret meeting, during

which he will present his project of "Federal Bank". Frank

Vanderlip, who participates in the meeting as a representative of the Rockefeller (his memoir reveals, twenty years later, circumstances and details of the meeting). Senator Nelson Aldrich, a sort of "Mr. Hyde" of American politics, at the time, among other things, Chief National Monetary Commission, charged with leading an investigation into the financial crisis of 1907 (and try to determine the suspicions that they were the "maneuvers" by John Pierpont Morgan (sic)). Henry P. Davinson, Chairman of JP Morgan and Company, Piatt Andrew, Vice Secretary of the Treasury, Benjamin Strong of Morgan Bankers Trust Company. These gentlemen would have the task of formulating a bill (the so-called "Aldrich Bill"), based on the findings of the National Monetary Commission.

Meanwhile conducted to highlight the causes of the crisis and provide remedies for the recovery and routes economic. It is at least what they expect the House of Representatives and the Senate to that end have formed the Commission (chaired by Nelson Aldrich, a symbol of collusion between politics and finance, and beloved grandfather of Nelson Rockefeller and others with the same name which is handed down the technique of "transformism."

But, why so secret? If they ask reporters, flocked to the station in Hoboken (And promptly removed). They are hunting for scoops and seek confirmation of what transpires from environments that count. If you ask, a month later, also William Taft, President of the United States, when he receives the proposal (prepared by an already existing "Federal Advisory Council"), which subjects approval of Congress, anticipating the Commission candidly that he never met them will sign the next planned "Act" which make it a law.

The refusal, as later that Taft will have time to explain, is due to the fact that the Constitution "Norm", if it enters into force, would threaten the democratic institutions, seriously endanger the monetary sovereignty of the free American people. With the disappointment Commission and Senator Nelson Aldrich, Taft dismisses the proposal

(which is approved by Congress, which obviously has not wanted to highlight the extent and pitfalls), declaring, with clear and direct words, that the same law seems to be tailored to legitimate (as in other below) that it expressly prohibits ... that is, the establishment of a Central Bank that is not subject to State control.

The President, among other things, remember the warning of Thomas Jefferson, who more or less went like this: "Allowing a bank in the hands of private individuals is constituted in the Central Bank and carries a function of issuing public money, equivalent to permanently host an invading army in the home.

Among other things, Taft is not so stupid as to believe that it is enough to change the name in Federal Reserve Bank to hide the work of a Central Bank in all respects, as the Aldrich Bill provides for the establishment of 12 branches in many states, just to confuse us. And finally, because Taft, as well as political responsibility, that minimum of decency, it would not later than its successors, in the name of political correctness, "formula" that does not require verification of Kafkaesque memory, to prove that they can become unconstitutional nonsense rules for standard use.

But then (as now, the rest of) the shock therapy is practiced with ease, extensive use of keywords, such as freedom and democracy, more functional (like the financial crisis) to the then constituting the Federal Reserve System.

(So much to believe in recent times the current Fed chairman, Ben Bernanke, who is politically correct in his statement: "The Great Depression of '29? We were the ones that cause it. "By "we" meant deputies, senators, presidents and U.S. men Fed welcome International Banking). Taft so there it is!

It is a shame! But it should nonetheless be given a system in the world, because the revolution industry is bringing in big steps at a crucial turning point: the change of the energy regime. That is the prevalent use of oil in internal combustion engines.

The financial monopoly capitalism and international banking network of the House of Rothschilds of London, clearly aims at gaining control of areas where oil already is copious and runs all over the planet's fossil fuel research to be conducted in febrile competition with the Great Powers of Europe, Tsarist Russia and the United States (the Empire of the Rising Sun dealing with China and Russia itself, is already thinking about the effects of a conspiracy against her).

As for the "areas of influence" the most careful diplomacy opens the criterion of "control distance ", to protect the extensive and consolidated British rule, with the rising, of foreign troubling, imperialist fervor.

It is worth remembering that the oil of Mashid-i-Suleiman in Persia (accidentally discovered in 1907 by William D'Arcy, impoverished English nobleman and an archaeologist in his spare time), is the subject of avid attention by John A. Fisher and Winston Churchill, and an increasing source of anxiety by John David Rockefeller.

The Cartel of his Standard Oil, crushed by the law as Sherman, but operating under false pretenses, halved the risk of seeing its market presence Europe. The danger is from the baby "Trust" with the temporary name of APOC (Anglo Persian Oil Company) that covets a course to provide for the needs of the old oil continent, thanks to the exclusive exploitation of promising deposits of black gold in the territories Persia, Mesopotamia and Saudi Arabia. In the dispute, however, it must confront the cunning British, not so much with the United States (linked through the Fed system, a "London Connection" financial), but with the demands of the Kaiser Wilhelm II, determined to enforce the rights of the Deutsche Bank, which owns 25% stake in the existing Turkish Petroleum Company, uncomfortable heir to the Turkish Ottoman Empire.

But there is also the fear that in Europe and in Germany itself, they have started production on a large scale of internal combustion engine automobiles, emulating what happened in the United States in 1908, they circulated many copies of the "Model T": The car that Henry Ford wanted to launch in the U.S. market at affordable prices, among other points the success of" making the production of the criteria of making related to the assembly point on the amount and distribution automobiles as a means of transport.

In the Central Powers, among other things, people are pawing the ground (such as von Tirpitz) to create a large Flottenverein" which in turn will counter the British rule of the oceans. It should So replace old coal-fired engines in use at the Merchant Marine and Defense, with the new engines, designed by German Rudolf Diesel in 1892 for the appropriate use of petroleum.

The "Consecutive temporum" is not only suspected: the Federal Reserve Act comes into force (in December 1913) when it is in progress (with the big bucks of Deutsche Bank) the construction of the Railroad Berlin to Baghdad, because of concern that tensions are likely to turn into open conflict and ...

in July of 1914 World War broke out.

The world is always divided between oppressors and oppressed, and behind the scenes there is one who controls and other, deftly maneuvering the sole aim of adding to their shoulders. Everything is in full contempt of the geopolitical theory of Karl Haushofer, who inspired ... tyrannical invaders and always ignored by those who fight for freedom, as the equitable distribution of resources of the planet is get (or conquest?), employing a large part of the national budget ... (or, to be clear the debt on which derive profit from the Fed). Best tradition of perpetual torment millennia list, represented by the "Bank" as an institution: founded on the principle of reliability third parties (including governments), for which a "credit" is offered against collateral, and if it is the state in need of money, he is almost always asked to "guarantee" the loan. Giving up monetary sovereignty and economic independence. The trick succeeds perfectly, when great interests are at stake, or, as it was then called (Scrambling politics, economy and society), when it comes to program the new Order World. So, are politically correct, concepts and practices of the previously mentioned areas of influence, protectorates, the "indirect rules" with the support of the dictator's wishes, to be hung on the gallows at the appropriate time. But it is also the arbitrariness of the International Banking maneuver aimed at the change of power purchase of the currency. How?

Banks can fulfill imperialistic yearnings, proposing the purchase of weapons with the help of political leader:. But you work in the gold market for the currency of the buyer country which loses purchasing power against other currencies.

Finally, the well-known International Banking Cartel tries to ensure a comprehensive package through the medium that is more congenial, Wall Street, and the "openness" of foreign financial markets, with which it establishes continuous flows of liquidity. The Federal Reserve System, perfectly meets the need. In fact, its mechanism provides that the majority of the capital of the Federal Reserve (initially set at 53%) is entirely in the hands of private financiers (read Morgan, Rockefeller, Kuhn Loeb, J. Henry Schroder are among the greatest, all equally related to the Rothschilds of London). Namely access to the full power of shares traded on Wall Street with profits of Cartel International bankers, thanks to "Insider Trading" and the trick of "Bonds" of the Treasury. Liquidity in short rivers with the issuance of notes without limit, because it should predict the law and its insistent "international projection" of a financial instability

period.

Who pays? The Taxpayer, again!

Small investors (called "float": another way of defining the oppressed masses), almost always!

The "Large Customers", as the Big Money by John Dos Passos, aka Wall Streeters ... ever! (For the sake of appearances will take care of twenty years after FDR, a creator of "Ghost" unprecedented in financial history, the Stock Exchange Commission). But, the scam of the century as he did to become law, or Federal Reserve Act.

With the help of "pressure groups", British invention (also recommended in Washington) to ensure that Parliament approves. In the U.S. things are a bit different, even if the amendments are involved in support of certain resolutions that oppose the Constitution. Paul Warburg, a naturalized American (but direct line with his brother Max, banker who was also in Frankfurt), is a fox in politics and knows as capital is invested in the great duty: not only by funding wars and revolutions, but also Presidential campaigns. The "grain" is not enough, you need the skills and the illusionist "Airborne hat", a top hat. It introduces democracy and (voilà!) if a President selected extracts, pace Public Opinion, as usual custodian of prolonged victim of illusions and great deception. The rule is silent and still in force: the presidents, first select it, then elect democratically and, if appropriate, "replace". For example, when Abraham Lincoln comes to mind print "Green Backs", it sends directly in the Hereafter, where the tickets do not compete with anyone and can curse because they like the corrupt politicians. But Auguste Belmont is not a politician, as the politicians are not Erlangers.

Who are these people that do not to know the Rothschilds of London has hired them to finance the North and South Civil War, at the subsidized rate of 12%.

The dynasties of the big bankers are prolific, but another offspring makes its way towards the end of the nineteenth century, the breed of fixers, to cross the blood-line of statesmen. Of Merit Morgan (Railroads) and Rockefeller (oil), ie, two signs which, added to three others, form the five "Robber Barons".

F.D.R.

Families may, like Franklin Delano Roosevelt and pawing, but their offspring, their way, they must aim for the presidency. Also for example, in 1901 Theodore Roosevelt (cousin of Franklin Delano Senior Roosevelt) seems the most suitable to replace the undecided William McKinley, obstinate and intolerable supporter of the gold standard in order to complete the Spanish-American War. One leads to another Republican. McKinley is the Creator. We sent him the usual anarchist.

Teddy was elected president, industrialists and bankers are ready to predation: Manila Port Rico, Cuba's sugar cane. Some would see the light on the strange explosion of Maine, the U.S. Navy cruiser, sunk in the bay of Havana, with 262 casualties (we are in 1898). But Theodore Roosevelt explains two years after that, wars are just. Morgan and Rockefeller cheer. Part of their capital invested in the Company of the Panama Canal is tenfold.

In 1913, William Howard Taft seems to have the consensus that ensures the second term president, but he is scrupulous jurist and a "poor politician". I know the Morgans, the Rockefellers and Leopold Rothschild, Banker in London and tutor of King Charles V Financial, Saxony-dynasty Coburg-Gotha, aka Windsor (not to knock his subjects in peace and in war).

Theodore Roosevelt, who advised Taft as his successor in the appropriate earlier elections, candid surprise among Republicans in competition with its recommended, gnaw marks needed to continue to reside in the White House.

You're done! Just make sorties from the cylinder a little professor at Princeton, democratic, too lawyer, critical but submissive, (in 1886 wrote "The Congressional Government" exposing gaps in the Constitution, which he considers to be "susceptible to corruption.") But it seems astonishing when he says "I analyze facts, and confine myself to diagnose, not prescribe remedies. " He is Woodrow Wilson, 28^o (Democratic) President of the United States. With the (selected), there is the shadow man that has put at his heels, in the role of advisor: the Colonel Edward Mandell House.

The Wilson administration shall: be tolerant of "pressure groups" and providential lizard amendments. Presented to the vote of Congress, become the Aldrich Bill Vreeland-Aldrich Act, establishing the Federal Reserve System, a powerful tool (such as Vanderlip wrote later in his memoir) by which control is exercised in the world economy. Meanwhile, growing denser clouds threatening the entire planet, ready to unleash the storm. The large Powers decided to link their colonial interests to say, by removing obstacles of old time. But it is on the European theater that we are witnessing the "game of mirrors." The signals are reflected by a forth across the ocean, by ordering the opening of a diabolical plot, orchestrated in the City London. For the time being has a name that will go down in history: First World War.

It takes as much of the massive doses of secrecy and lies to also select the pretext transform casus belli. Waiting for it to refine the techniques of mass persuasion, the "Mysterious device" Jekyll Island shows the perverse effects of his operation. The Art to deceive the people does not include the obligation to write the story? But everything seems to have predestined. The grand design, of which the Federal Reserve is indispensable instrument is called, as already mentioned, the New World Order.

GOLD AND THE WAR

Before 1914 an ounce of gold was worth \$ 20 in United States Notes. With a \$ 20 bill they bought, net of expenses exchange a gold coin weighing gr. 31 approx. Today it takes 50 \$ 20 bills (Federal Reserve Notes) to buy the same gold coin, if it is available. That seems obvious, or better, "physiological". Everything is explained by loss, over time, the purchasing power of money, ignoring the fact that anyone who uses it must simultaneously be load of debt and take on the burden of paying perpetual interest. Which, of course, is not obvious, but thanks to the alchemy policies and actuarial science economically correct, even if ethically fraudulent.

The legal tender, in fact, is not only a means of payment, but may become, the instrument of speculation of private capital. Who does not believe it could take a look at the capital of the ECB and Bank of Italy under the Euro (Domains in the year 2011). But it should also ask why there is the LBMA in London (London Bullion Market Association), inaccessible place where every day is priced gold on the world market.

That it occurs from 1919 (the year of widespread suspicions) is unconvincing, even if covered official. In fact, the practice dates back to 1815, but the above is true of 1773. So the idea of Mayer Amschel Bauer becomes technical financial condition of the contemporary economy.

He (Mayer Amschel) has a small shop in Frankfurt, but it is not a craftsman, but a merchant of gold, as they call at least two generations later, the British rulers, ie "The Goldsmith" (which means "gold dealer"). Nickname that stuck will also when her son, Nathan Mayer, will be knighted by King Charles III (Hanover dynasty) and these joined the British court on a permanent basis, as an economic adviser of His Majesty. The idea (on the very first pilgrim) of Mayer Amschel Bauer is to fund the King (gold) provided that this gives him the sole responsibility for tax collector, without prejudice to the right lender to negotiate the equivalent of certificates of deposit different squares. The design is ingenious, but to make it go into the lap of the "Judengasse", where the gold exchange with cash in large quantities and well beyond the scope of lenders less noble that thrive in the adjacent lanes. The leap is also appropriate to assume a new surname, which (By law) must be changed. This suggests a Red Shield (Roth-Schild), a symbol that stands above the old shop of the dealer pledges. Mayer Amschel Rothschild becomes (photo)

But it is only the first step. People need to be the great "Gold Dealers" of Frankfurt, inviting them to use their substantial capital most profitable (compared to the current and limited to only Town Square on Main). Master the art of persuasion and very with diplomatic flair, Rothschild established a sort of colossa game without borders, focusing on the entire Achilles heel of great powers, the balance sheet.

Imperial pretensions and social turmoil are not for him the right signal indicators increasing investment of capital which he may gradually have. Gold is "money" international sovereign peoples and able to buy and replace banknotes currents (I know the kings dreamers and revolutionaries chasing utopias). But it can become be a constraint or vice versa credential necessary (and not always sufficient) to the maneuvers financial and political circumstances may warrant. All things that Rothschild senses, providing opportunity to gain on the convertibility of the currency, but also on making money trading of certificates of deposit that should be the equivalent in gold.

Between disputes never fully defined, thus saw the gold standard.

But doubts about the real existence of a gold reserve (corresponding to the currency in circulation) is secular, like the one on the variability of the ratio gold / money.

The idea of Rothschild became still, and revolutionary Europe in the decades to come, the criterion money, according to which it creates money and profit from tax revenues. This is possible even when you do not have the gold (or if they have lost possession).

How?

Bargaining certificates of deposit equivalent to the stock exchanges of Paris, London and Frankfurt, among other things, it reserves replacement to justify the issuance of other notes (in the language of Fed "Legal tender"), that is, money in general use.

In the circumstances (at the time of "enlightened" Mayer Amschel) promises to the King the opportunity to protect the defense of the kingdom, buying weapons. The gold, in case of war, it is collateral, but in the financial markets in the securities that they represent. He will learn at their own expense, Bonaparte at Waterloo, and one hundred and thirty years later, Adolf Hitler.

House of Rothchilds

Inaugurated as the speculative economy of the free market can not stand the political balance and see, in armed conflict, greedy of gain opportunities. Rothschild provides the exclusive expertise in the marketability of the certificates Deposit and any attachment to the gold standard, providing Rothschild Houses, in London, Paris, Vienna and Naples,

the banker whose guidance the newly placed (Including Frankfurt), his five children. The order is imperative before handing the gold to King, you sign a contract, in which he acknowledges the debt (the kingdom) and authorizes the lender to issue currency, in quantities equivalent, through one or more banks. Applies to that effect the well-known certificate filing, signed by the monarch, who needs gold, to make war or quell a revolution (or, as often happens, to balance the books). The convertibility of gold in Currency is useful when the King becomes insolvent, or refuses to follow certain political advice. The conspirators in such an event must be paid in notes, as well as revolutions, no money, you cannot do. In the same way you finance even the reactionary forces, provided that the next government, born of the restoration, it entrusts the House of Rothschild control of public finances. The Network of the Red Shield works perfectly, given the times we live in Europe and the New World, where the English crown in danger of losing control of his political and monetary American colony. The founder of the Rothschilds, as well as astute merchant, was a careful observer of a society in turmoil, in which tensions between classes come close to breaking point, as we go affirming the power of the Old Continent "Third Estate" or Bourgeoisie. The Rothschilds

The European Theatre seems an ideal field of application of the technique of generating public debt learning, through which you can transform the national heritage in private capital. It is suggested by the principle that the money (aka certificate of deposit in gold, which concrete existence can also be hypothetical) means of payment is liberating from the constraints of a debt, though ... depends on where and when. That is different from the evaluation of gold or certificate that represents it. This explains, among other things, for Edward III in 1345 refused to adhere to the demands of bankers Bardi of Florence. In fact, the Hundred Years War persist then, the price of gold was skyrocketing in the United English (thanks to the high demand for the precious metal, for the purchase of weapons and establishment of new armies) and constituted a pretext for not meeting the demands of the banker Florence (which asked, papers in hand, returning the same amount of gold in its time given to the monarch).

Capital which, converted into guilders, "is worth a kingdom" as Villani tells us, because it refers to price of gold, but in different times and circumstances. Four hundred years later, thanks to his intuition, can this be fixed by putting in Rothschild playing the financial markets (Amsterdam, London, Frankfurt and Paris and later New York), in which are traded certificates of deposit. In the middle there is always "King Midas", which brought together a whole bunch of these documents and plans to invest representative where the gold is worth more: the square where there is greater demand, because it involves a war and an increase in spending for weapons, or a revolutionary movement and the supply of money and weapons to the insurgents. The tense atmosphere, originated from imperialist pressures and prospects of independence,

facilitate the use of capital (gold or corresponding certificates).

But, as already noted, if the king should make war, the gold price rises.

Consequently, a shrewd investor, put in the position to do so, contributes to the eruption of the conflict, properly hiding the less noble intentions that cause it.

The banker of the king, who cannot ignore the rapid developments in the rational-liberalism, it will find good opportunities for investment in the fund even those who are opposed to the King, on condition that the "trust" (or debt) is then paid in the form of tribute from the taxpaying citizens. So the banker provides the possibility that he may, if necessary, convey to the masses oppressed, if that helps its financial goals, not excluding the possibility of deciding their own support the alleged oppressor, against which will be legitimate to finance a war of liberation. The latter falls in the category of so just wars, financially supported, the order to reap a profit anyway. House of Rothschild became a specialist in the sector and operates through a network of selected agents, spread in Europe, Asia and the Americas. In the France of Louis XVI notes the alarming escalation of public debt in 1783 of nearly the unsustainable peak 1,640 million "livres", thanks to the reckless moves of the Minister of Finance Calonne, who already use the gold market is managed by Rothschild. The fees charged to farmers are not enough to pay interest. This calls for the infamous "cut" classic straw that the camel's back. And the rest that follows is known. The titles of the French are treated in the United Stock Exchange Frankfurt and London that determine a noticeable decline, prompting Paris to suspend trading day. King does not pay to cut his head and comes ... the contemporary age. In London, constitute the first "Accepting Houses" in whose coffers are kept much of the Treasury French crown. The director of finance in London is headed by Nathan Mayer Rothschild, who proposes the immediate release of the pound sterling off the gold standard when it forms the Seventh Coalition that will put an end to aggression at Waterloo and the utopian dreams of Bonaparte, who gold for years plundered half of Europe, North Africa and Russia. These are the two faces of the gold standard sort of fetish that conceals one hand the virtues of the Holy Grail and the reverse code the perfect scam.

The United States has gained political independence, but the U.S. economy is increasingly slave of the "Rothschild Method", thanks to a functional mechanism known to the practice of the Fiat Money, which many have called London Connection. Something reminiscent of the "Trick or Trade?" and the tradition of Halloween. He also handed down from father to son, like the generations of international bankers. Thus, the economic crises, recurrent since 1837, almost equal in frequency to end tricks October, as the order of recall, sudden and unjustified, the "short-term receivables" and similar banking wizardry. This is the trick in the States (and elsewhere) because delinquencies chain, cracks financial and collective panic syndromes. The trade is the obvious next step, which, translated, means increase in the discount rate and tax

revenues, decreased purchasing power of money and additional public debt.

In this way, independence and autonomy (political and economic) go to hell. In the complex interplay of early twentieth-century imperialism, we measure financial astuteness and power of weapons, because at stake is control of areas rich in raw materials and, particular, as already mentioned, the oil.

The indebtedness of the State, therefore, before the issuance of currency, ie a flow of liquidity take urgent steps to not cause further inflation and unsustainable expense. Financial markets thus stimulate public investment, forcing the state to increase expenditure on arms. What does a State debt and well equipped with weapons? Try to use them, to limit liabilities. And then because the weapons used are useless-serve as a deterrent, but do not improve the balance sheets their use, behind the most trivial pretexts, and the most contrived provocations, can turn a passive in surplus, until another state intervenes, in debt, but that is armed to the teeth forced to act as a belligerent.

A sort of chain reaction, like that well thought out by Rothschild, in the period before the First World War. Debt, economy unstable, passive unsustainable, wide availability of weapons, the obligation to use them, war.

Here's the scenario that is emerging in Europe, following the entry into force of the Federal Reserve Act (January 1914) when you start the full operation of the Federal Reserve Bank of New York, operational tool of the Bank of England, which in turn is closely connected with the House of Rothschild.

Woodrow Wilson (photo) is very good lawyer who does not prescribe remedies, as he himself confesses. Suggesting that corruption and moral degradation can meander to Congress and the White House, under the eyes of President, as if it was not his responsibility and duty to adopt appropriate measures to eliminate them. In Washington, however, as nell'Atene of Pericles, freedom and democracy are the myths of Olympus, which sell well. Just package them as a valuable export commodity. Purpose is founded the American International Corporation, second daughter of the Federal Reserve System and network of corporate banking giant.

American policy, which does constant reminder of the mission of propaganda faith, ritual, capable of hiding in deception and fraud, while be believed. Finally eligible, humiliating, and shameful

not give up his breviary, a myth, opens so the great according to a new, refined the shadow of a myth, obvious, but so familiar as to because the origin of a colossal misunderstanding.

REQUIREMENTS OF THE FIRST WORLD WAR

(Operations for the entry of the United States in the conflict
capitalist and support the Bolshevik Revolution)

The "Quarterly Journal of Economics," in an article published in Washington in the month of April of 1887, notes the unsustainable debt of European countries, the hope of formulating a urgent restoration of their budgets, explicitly expressed in the following warning: "The finances of Europe are so compromised that the general government indebtedness should ask whether a war, despite its horrors, is not preferable to maintain a precarious and expensive peace. "

Among the general confusion, as we assume, then, that article was how to result, we learned that the European Powers, subject to stringent financial constraints, because payments which would have been forced to follow between 1887 and 1914 certain political orientations such to lead to a conflict unprecedented in history, in order to pay their debt (Public debts of Europe (sic)). In short, the war (World) was the only alternative to bankruptcy. The "Quarterly", destined to become prestigious in international business circles, attributed the origin of the colossal European public debt (something like 5,300 million U.S. dollars at the time of annually in line to pay interest) to the management of so-called gay "sinking funds" (funds government, made up as collateral for bonds issued by the State), by failing to indicate that just these are a fundamental part of the mechanism adopted by the International Banking System indebted governments and declare them insolvent, when the tax levy is no longer sufficient to repayments (principal and interest) the "loan" granted to them. The technique, the Investment Banking, provides, among other things, the "mobilization of credit", ie the reinvestment of funds (Through the services of the Central Bank), and special attention to procedures for depreciation faced by the tools (eg weapons) that the debtor has acquired, thanks to a loan granted to him. In the Europe of the early twentieth century the political climate, tense, seemed about to unleash the storm, announced by the rest of the revolutionary ferment never placated, conflicting demands and pressing demands of tenacious imperialist nationalist groups. Circumstances from which emerged the need to provide, however, the increase in expenditure for defense, although the debt contracted by the European Powers was unsustainable. Banks International lending, among other things, intended to suggest (if not require) States to the restoration and upgrading of weapons made obsolete in the meantime, recommending the urgent use (and the wider consumption of essential ammunition, produced from their Associates sector). Suggestion that would oblige governments to provide for the subsequent

conversion of economic production, necessarily bound to a single application: the war.

The International Banking acted in perfect symbiosis with its subsidiaries (steel, chemical munitions), forming an efficient capital structure, industrial, also called "Conglomerate" or "Corporate Banking", of course, likely to influence diplomacy that the international latent hostility turned into open warfare. The effects of the influence exerted on governments by international banks are evident in particular in the crucial period 1907-1914 (the financial crisis, no end of intrigue around the Anglo Persian Oil Company, plan to plunder the dissolving Ottoman Turkish Empire, constitution the Federal Reserve System), during which they observe clear signs of the impending conflict. The great powers (or presumed), perfectly aware of their dependence on the system Banking and oriented to align the interests of the latter with their own, they know they need capital and availability of raw materials to build or maintain dominant positions, confidential however, preferred customers, not for political sympathies, but in any case for most profit that the system expects to take the investment. In this scenario, Great Britain intends to consolidate its empire (India) and assert its dominance over the oceans, without forget the financial influence it exerts, through the Bank of England, on his ex- North American colony, the United States of America, through the combination, then made between King George V and Leopold Rothschild of the Rothschild House in London (which in turn uses the its agents in the United States, Morgan and Rockefeller).

Britain's main rival is the Germany of Kaiser Wilhelm II, prone to enhance the fleet for the conservation of their colonies and not to give up aspirations Germanic territories on the Turkish Ottoman Empire. Driven by revenge, after the defeat in the Franco Prussian, France is a bitter enemy of Germany for the eternal dispute Alsace-Lorraine. Giolitti's Italy, ended to his advantage in 1912 the war with Turkey for Libya, is one of the best since 1850 customers House of Rothschild, which should, a few seconds, thanks to multi-year funding to the Savoy, the desired national unity.

The framework is not complete. Missing tsarist Russia, which pre-war scenario is a special case, ifwe believe those who say that the misunderstanding between the Theses on Feuerbach and social protests than half of the time there was, as always ... the Bank. That is, you can also pay handsomely the hot air, provided, sold in the form of ideology, performs appropriate functions graders, determining sufficient to prefer illusions to the alleged benefits of the collective hunger. This means among other things, that the spread of a

revolutionary ideal and debt are generally means justify the end the same: control of the masses.

The strategy of the International Banking conspicuous place on the influence that it exercised due political connivance, the Central Bank, whose banking network control functions internal, such as the directives of the three economic ministries (Economy, Treasury and Finance) for Institute of Issue, become almost exclusive competence of the international banks. This is because the Central Bank is subject to the progressive alienation of their capital social work and in favor of banks and private organizations (including rating agencies), whenever an international loan is disbursed to the State.

If war is the most profitable financial instrument, debt positions regulator, defined purpose unsustainable, Creditor's interest will demand repayment of capital paid in loan (or in the immediate deadline), commanding the debtor governments. Any declaration of insolvency is equivalent to the issuance of authorization to seize the assets, consisting of under warranty, the coffers of the creditor, who, in order to achieve the rapid return of their exposure, in any case has the right to direct the foreign policy of the government, forcing it to create opportunities for new and larger investments. This opportunity, which the creditor kindly granted, it's called war.

In the winter of 1914, it became urgent to meet deadlines, under the threat of imminent war many crowned heads of Europe at the time, to see their confiscated treasures, well kept in coffers of the banks in London, members of the "International Banking System."

The case of Romanov is significant. It is worth to note about the development of Anglo-Russian relations starting from 1876, year in which you are in London, thanks to the revenue of the Suez Canal Company (50% is financed by the Rothschild Bank, which purchases a year earlier on behalf of the British Crown Egypt's share, paying £ 4 million to Ismail Pasha), those that will be called "Accepting Houses", special banking organizations affiliated with the Rothschilds and Hambros Bank, which will have the task of administering the market for bonds or bonds issued by the debtor (Object of special attention would have been such debt for war reparations of 31 billions of dollars of the Weimar Republic). But in the case of Tsarist Russia, it seems documented the long-term contract stipulated that Alexander II with the Rothschild Bank in London in order to obtain financial support for waging war on Turkey in 1877. The claims advanced that the Tsar, the war ended, of Constantinople and the Bosphorus, were rejected by the first British minister Benjamin Disraeli, not only because it hampered the British routes to India, Empire but also because of all

the Russias was insolvent against the Rothschilds. The same reason that Disraeli he pointed out the political expediency of granting loans against release of collateral by the successor of Alexander II, Tsar Alexander III, then the result equally unreliable. The constitution "pledge" of much of the treasure of the Romanovs, kept Accepting Houses in the vaults of London, was also reflected in the next input Russia among the Powers of the Entente, after Nicholas II had been convinced that further help Financial Rothschild (according to the procedures and provisions described above) would have been needed to strengthen an army sufficient to cope with the alleged threat of Empires Power plants. Given then that the Tsar was still insolvent for adverse outcomes of the war Russo-Japanese, London (or rather, the London Investment Banking Branches) prepares the giant trap from which they would have suffered the same Tsar and the Russian people. But not before it was rendered politically justified the war long planned to "save" European governments from bankruptcy. All preceded by the start of a plan, agreed at a table with the United States, represented by President Theodore Roosevelt. He is in fact would be proposed as a diligent servant of the 'International Banking since the Spanish American War, conduct in order to facilitate the emerging monopoly of sugar cane in Cuba and expansionism of the Caribbean and Pacific States (Puerto Rico and the Philippines). The collaboration with the "Accepting Houses" London was then evident in the operations of the syndicate of banks International, formed for the purpose of determining the collapse of the Tsarist, in order to protect the British banks and to safeguard the interests of the British Empire. The powerful Bank of England, who by now would have false papers to found the United States its subsidiary (ie the Federal Reserve Bank), would have had ample opportunity to share in International stock markets, mainly Wall Street, through which flows would be prepared money for the foundation of the Soviet Union. Appear largely to be documented transfers of money made in favor of the revolutionary Bolsheviks between 1905 and 1920 through the Kuhn Loeb & Company in New York, bankers Jacob Schiff and Olof Aschberg, which operated under the direction of Alexander Helphand, aka "Parvus", the coordinator of funding to insurgents on behalf of the Warburg banks in Germany. Among the direct beneficiaries of these funds, there were the famous Vladimir Ilyich Ulyanov, called Lenin, Trotsky and Lev, the prophets Marxism and builders of the future Soviet society. (In 2008, all Hoover Institution Archives Stanford - California were declassified bank receipts of money transfers, for totaling \$ 20 million, made by Parvus in favor of Lenin and Trotsky from 1915 to 1917).

Financial maneuvers of undoubted efficacy, compared with less satisfactory results of similar operations, which is carried out in support of the Boxer Rebellion in China in the first years of the twentieth century, that in each case represented a test case for the following interventions the International Banking

at the side of greedy corporations Anglo-American, decided to lead in the systematic looting of mineral resources in China. The Americans, firmly established Canton, and the British in the valley of the Yang Tse River, seemed determined to dislodge the Russians from Port Arthur, the Japanese from Formosa and Korea, the Germans from Shantung mines, the French Indochina and southern territories. On that occasion the money handed over to the insurgents (Boxer) would serve to justify the presence of twenty thousand Marines in China, led by prospector and fixer Herbert Hoover (later President of the United States) against the same Boxer, the cost-effective tactic was adopted by the Americans in support before the revolt, for then sedate her, turning it into an excuse to acquire new lands for exploitation, making their way between the competitors.

But, back to the Bolsheviks, who would have the interest to promote the Western Capitalists construction of a communist society being formed in the Soviet Union? The strategy the International Banking you can find the following responses: immediate objectives of those who supported the Bolshevik revolutionaries were the aforementioned collapse of the Tsarist regime, seizure of treasure of the Romanovs (stored in the vaults of the Rothschild Bank, after the formal notice of Nicola II, and eliminating a dangerous competitor (the Tsar) in the race to Gulf oil Perch. Capitalism (in the process of dealing with a system that formally represented the exact "opposite") would also (and for that matter) had a chance to settle at positions more radical, on the other justified, or being eternal justification, it congenial theories. The the so-called liberalism, which would dominate the principle of "laissez faire", or limitations State intervention in the activities of free enterprise, would have drawn from the Marxist thesis opportunity to grow vertically, reducing the free market in an area of privilege, in which would be excluded business risk to benefit those who have financial means, not suitable only affect the economy of the state through the perpetual "debt-blackmail", but its place on a political level.

Needless to say, the constitution of the Soviet system, where it is forbidden to activate each free enterprise, and the planned expansion of the communist threat, the idea would be functional a monopoly of capital, not just dividing the world into areas of jurisdiction, but supporting the claim in the West a unique "Power Elite" capitalist. Capitalism monopoly would thus have been able to consolidate itself, thanks to communism, avoiding the danger that could arise from Czarist Russia a federation of states, aiming to expand in Eastern Europe

and Asia in order to create a new capitalist force, ready to compete with United States of America.

The Communist Manifesto was thus assumed value of a statue Wall Street, where Lenin would have been selected as the leader of a centralist state, guarantor the illusive power given to the proletariat, in order to achieve absolute control of masses, through the system of planned economy. First step: the nationalization of Russian banks and the establishment of a Soviet State Bank, as provided in the program of Lenin and favorably received by Wall Street.

In support of these arguments, it seems appropriate to add certain aspects of market strategy, developments related to U.S. oil industry, since the early years of the twentieth century. Particularly interesting in this regard are the initiatives taken by the Rothschild Group-Oil Rockefeller, following the entry into force of the law "antitrust", Sherman Act, and in anticipation of Ford plans to build cars in the series. Which would have led the Group (The association of the two empires "Banks-Oil" is obviously not random) to take a hard control of the international oil market, as a result, among other things, the dismemberment Standard Oil, and following the so-called "Spindletop case." (*)

The reference to the U.S. dollar (petrodollar), then it would have been claimed for each transaction on the international market on oil products, by adopting a system of containment of the fluctuations in the price of crude oil that prevents hazardous and non-profit downward trends. This would have led the Rothschild-Rockefeller Group to promote effective media campaigns aimed at spreading baseless news about the alleged shortage of reserves (and resources), the world's oil, in order to prevent harmful effects were produced "dumped" in internal market (as the fuel demand was growing with the launch of the Ford Model T automobile).

It would be especially appropriate not to limit the Group's ability to compete in the markets international. To this end, it was evident that the political control of the world's most oil areas promising, such as the Persian Gulf, Middle East, Caucasus and Caspian Sea, would be essential. The Tsarist Empire, which then also included the vast area of Kazakhstan, would represented one of the most formidable competitors among the oil-producing potential, certainly decided to exploit their oil fields and market its fuel on the market International at a price way lower than that imposed by the Companies Rothschild-Rockefeller Group, due to low oil demand, given the almost

Tsarist Russia in the absence of industries and the state of poverty of most of the the population. To forestall that eventuality, the group in question, the summit of Corporate Banking, would thus encouraging the establishment of regimes that would ensure, behind great rewards, a policy under the control of a centralized government. Among the reasons that induced the Capitalists U.S. to finance the Bolshevik Revolution.

Finally we can mention those related to plan establishment of a Jewish state in Palestine and efforts to prevent the creation in Europe second pole of a capitalist. Federal Reserve. The onset of the Federal Reserve in 1914 takes place in this climate, in order to facilitate the implementation of these plans. Coinciding with the start of hostilities, the Fed it works closely with the Stock Exchange New York, a real bridge built on the occasion between America and Europe, in order to make vain Kaiser's claims on Iraqi territory (rail Berlin-Baghdad), and forcing its natural ally, the Austro-Hungarian Empire, to make the flare "Balkan powder keg".

For this purpose, are made up of the Belgian Relief Committee (to help the "neutral" Belgium invaded Germanic troops, but also to allow them to keep fighting a war not desired) and the American International Corporation, through which Wall Street will be kicked off a series of investments among the most profitable in history, one that will profit Rothschild-Rockefeller colossal group of international banks and the team associated with it.

On this occasion it becomes operational the aforementioned Corporate Banking, specially designed to force Governments of the belligerent Powers to take advantage of financial support, for the purchase of weapons from the War Industry Board of Bernard Baruch, the banker and prominent member of the associated World Zionist Organization.

The onset of the Federal Reserve in 1914 takes place in this climate, in order to facilitate the implementation of these plans. Coinciding with the start of hostilities, the Fedit works closely with the Stock Exchange in New York, a real bridge built on the occasion between America and Europe, in order to make vain Kaiser's claims on Iraqi territory (rail Berlin-Baghdad), and forcing its natural ally, the Austro-Hungarian Empire, to make the flare "Balkan powder keg".

For this purpose, are made up of the Belgian Relief Committee (to help the "neutral" Belgium invaded Germanic troops, but also to allow them to keep fighting a war not desired) and the American International Corporation, through which Wall Street will be kicked off a series of investments among the most

profitable in history, one that will profit Rothschild-Rockefeller colossal group of international banks and the team associated with it.

On this occasion it becomes operational the aforementioned Corporate Banking, specially designed to force Governments of the belligerent Powers to take advantage of financial support, for the purchase of weapons from the War Industry Board of Bernard Baruch, the banker and prominent member of the associated World Zionist Organization, as well as persuasive counselor to the American Presidents.

THE BIG BUSINESS OF WAR

You do not need to ask to Lord Walter Rothschild, nor all'esimio Colonel Mandell House that 1913 has already drawn up the Fourteen Points, enunciated by President Wilson to the Peace Conference Paris in 1919 (worth a Nobel Prize, the shattering of three empires and countless outbreaks of hatred and resentment from the North Sea to the Indian Ocean). The strategy of Investment Banking, coordinated Houses by the Rothschilds and what would become known as the Standard Oil Company of New Jersey (later Exxon), is therefore also successful in the States thanks to the Federal Reserve System, through them who have already returned in the form of taxes paid by U.S. taxpayers, the 25 billion dollars created out of nothing, and to advance belligerents to start World War.

On this occasion we distinguish the Chairmen of the Fed, Charles S. Hamlin and William P. G. Harding, War Finance Corporation, manager of the latter, very active in the supply of weapons even before the U.S. war on April 6, 1917. In the midst of the war, so among other things to take shape the culture of the stereotype, or extreme simplification which will tend to comply with the opinion of the collective, essential for consensus building and later interpretation "reasoned" the so-called "Politically correct".

On Wall Street and the New York Fed while investors are rubbing their hands. While waiting for the already conceived Council on Foreign Relations, Washington branch of the Royal Institute for International Affairs in London, starts its manifold activities, the Anglo-American war strategy found successful application in three sectors: financial (as we have seen), military and propaganda. The task of the American press is, for example, invented out of whole cloth atrocities that the Germans would have done, in peace and war. The technique of repeated deception, perpetrated against the American people, later to be clearly visible throughout the work of the Wilson Administration, as a critical view on the role of the Presidents of the United were even then openly admitted by the

official historiography. Makes the assumption that legitimate, at least from an ethical, full membership to the thesis of Professor Carroll Quigley, widely expressed in his "Tragedy & Hope", which notes, on the basis of indisputable evidence, the absolute dependence of the White House by the will of the international bankers.

Significant examples of consensus building, intended to legitimize the unpopular actions Government and still considered socially and politically harmful to the lining Democrat leadership of the U.S. cases appear to Lusitania and Sussex, crafted (as then the effect Pearl Harbor and decades later, the Tonkin incident, not to mention the most recent "911") to convince the American public whether entry into war (declared or not)

.
Overall calculation of the risks of war, although some may justify the tactical secret transport of large caliber ammunition and projectiles on merchant ships of States "neutral". Obviously the intent provocative, useful to give rise to the expected reaction of a belligerent party against where that war material was definitely used, so that the consequences acquire the wait, extremely important propaganda. The proof is in the Lusitania, tons of that the ammunition carrying cargo to England by the neutral United States, "providential" torpedo U-Boat Germanic, which will cause the sinking of the ship, the death of hundreds of civilians and calculated outrage of the American public. Even today, the television media insist on presenting the sinking of the Lusitania as one of the most heinous crimes the Nazis, when even less tuned in politics knows that a neutral country not provide ammunition to the belligerents, with this without committing a hostile act, equivalent to a declaration of war. Still the warning of the German ambassador in Washington, Zimmermann, is carefully removed by the text of the special TV historical argument, suggesting that the responsibility the massacre was bound to fall on Germany alone.

The culture of the stereotype, then you will join the so-called "Spiral of Silence", the theory developed by Betty Naumann, according to which the power of the media (and the most important "oracles" academics) occurs mainly through the persuasive effects that can produce the mass audience, who can not help but, with rare exceptions, to take as true the version of a fact that is imposed, although it is clear which censors for propaganda purposes of the means of information. So, who disagreed with a "true multimedia" accepted and shared multitudes, give up the end to put it into question, not in "unreliable." (Fortunately, the victims tend to the spiral of silence decrease, producing stimuli to an investigation by the media is not borrowed "official", and in any case inclined to regard lies ... half-truths.)

The sinking of the Lusitania in 1915 is followed by the torpedoing of the "SS Sussex, which beginning of 1916 was affected by the usual "criminal" German U-Boat in the English Channel. Of course, the ferry would transport American citizens, 50 of which would perished in the sea. The same President of the United States would be ready to declare this "truth", built in art, when he asked Congress, on April 2, 1917, to approve the declaration of war on Germany (despite the offer of peace by the latter proposal to Great Britain, already on the verge of asking the other hand, since the course of the war to it unfavorable, the unconditional surrender). Among the few admirers of Truth (the one that does not offend common sense and the Divine Creator), ranks the Jew Benjamin Freedman, who will demonstrate the basis of irrefutable evidence such as photographs published by the American press, and English is not reproduce the carcass of S.S. Sussex, but the repair of a ferry in French Boulogne-sur-Mere yards.

The secret Sykes-Picot agreement of 1916 on the division of territories between Syria and Iraq France and Great Britain (which is well known to American), would have raised serious concerns in the political leadership of the United States, given the fact that Kuhn Loeb and the Banks Morgan held the bonds issued by their governments, French and English, the loan guarantee granted them by the Rothschilds. Prerequisite to ensure that in any case the "gateway open "to the American oil companies in the Middle East after the war. The sinking of the Lusitania (1915) took on political significance after the second election of President Wilson (White House is winning even with the lies!). In the circumstances it would be easy to detect a constant tendency of the American public to become intended victim of the "Fourth Power "of William Randolph Hearst, newspaper magnate and zealous executor of the orders of "Power Elite" financial campaigns to promote appropriate intervention to save the face of Woodrow Wilson from the spit of his constituents.

Meanwhile, (December 1916) the time for an input of the United States in World War II seem to mature, because the British urged Americans to keep their promises. Among the memorable and less well-known plots that would determine the subsequent course of the War World (and made the crucial second premise) it seems appropriate to include those that forced Britain and the U.S. to sign in secret in October of 1916 the the so-called London Agreement.

The intervention of the U.S. marked a turning point in the development of the first conflict. In a few months, since April 1917, the course of the war, decidedly favorable to the Powers Entente, determined among other conditions conducive to the success of the Bolshevik Revolution in October of that year. Calculated event, ahead of planned peace separate between Russia and Germany, strongly suggested by the Anglo-Americans saw

the discontent that existed between the troops of the Czar, from which were recorded daily in mass desertions. The Kaiser, saw the progress of the war, he then accepted the invitation to get the hell, storing for all the aspirations of a great Germanic empire, stretching to touch the waters of the Gulf Perch. On this occasion, he would be required for the final: to allow free passage of the train armored vehicle carrying up to Petrograd Lenin and Company, to establish the new regime Bolshevik, little inclined to accept the hesitations "social democratic" Kerensky, but well willing to receive best wishes for a bright future from the liberal American President Wilson, from too ready to show at the Paris Conference the need of support, moral and material, the U.S. government that Lenin would chose to have pondered and on the ruins Tsarist Empire.

SEVENTY YEARS AFTER

"The war stems from a moral disorder, long before that from an economic imbalance, or by a disruption of the political order. The war created by the offense "Don Carlo Gnocchi In August 1991, Moscow had no intention of having to curse Gorbachev and perestroika for the rest of their existence, much less to receive the prize of recession and misery for the contribution they demanded blood, prologue and a corollary of the planned funeral of the CPSU and, shortly thereafter, dell'ingombrante and anachronistic Soviet Union. The popular uprising in Moscow had the play of the the horror of Piazza Tienamen and Timisoara, moreover, provided the computer from the skull

Milton Friedman, as a side effect of a large operation, aimed at introducing an economy market in the Far East, Eastern Europe and the lost paradise of the Soviets.

As the protests, China and Romania, one raised in front of the Kremlin called for the respect that would be fair to acknowledge the sacrifice of three generations, willing to suffer hunger and famine and be slaughtered in peace and in war, but unwilling and certainly unprepared for the force impact of Capitalism, when it meant unemployment and loss of purchasing power

of its currency. To this was added too many fragments of broken dreams and the belief that, on balance, rigor despotic Ceausescu, and Den Xiaoping and Mao

"Benefits" of the planned economy, were preferable to an uncertain future, as here and beat

there with a good wind blowing an alleged Democrat.

So maybe not even touched the minds of the faithful and Eltzin Putin (formerly pervaded by trends world) were not enough to suspect that glasnost and a renewed Duma, or the staging of a coup, to convince the Russian people that the prospect of a formal independence

would have averted the danger of another, less visible, tyranny. The latter demonstrators Muscovites endured the effects, like inflation to 23%, lack of food and staples, the complete absence of any job opportunity, so it became permissible to send to that country, and Marx's theory of surplus value.

At that time no one is allowed to tell them that the lack of work creates conditions of slavery and at best (after the pattern of financial capital), the work of underpaid, because later the mass exodus to the West. Apparently oblivious to the fact that since 1990 were pouring on Russia rubles avalanches, falling to make the already precarious economy, the Russians would find themselves holding devalued currency and almost useless without knowing who the blame. Similar phenomena were observed simultaneously, to cite two examples, in Ukraine and Kazakhstan, whose respective currency (Hryvnia and Teng) were reserved the same fate.

The Soviet Union, including disappointments and surprises, would also become useless. Out of the office held persuasive Marxist utopia and unnecessary features that it would have played during the Cold War.

Although at first made it unreadable by widespread rhetoric of communism, designed in Russia and elsewhere, to get the approval and adherence of the masses a revolution proclaimed by Marx's plan actually would have had other purposes, later emerged, when it failed the same way by the outcome of a political mission improbable and increasingly uncertain. Gradient is the desire to fulfill the promises of a revolt planetary, conducted in the name and on behalf of a mere abstraction, would multiply the doubts.

Who asked who from the beginning anthropomorphic or more defined dictatorship authoritarian system, finally, the Proletariat, clarifying the roles of Lenin and the Bolsheviks, the ends do not reported five-year plans of Stalinist tyranny and of itself, keen to expand (despite promises) and communism the Soviet system, with only half that made it possible to implementation of a comprehensive plan: the war. The same task (assumed and declared) to conduct a world revolution (permanent or progressive?) would not have admitted, moreover, conditions peaceful co-existence, nor ruled out the systematic recourse to armed conflict and war, pretending to attribute to one another, and that he would find moral value justifications in a grandiose and too far-sighted project.

The occupation of the territory of others, necessarily linked to the export plan of communism, they also provided the shrewd use of war for others. The strategy adopted in If so, would wait: whatever was the outcome, the war would weaken the forces of the belligerent countries, Soviet aims and objectives of making it ideal ground to ignite revolutionary outbreaks that facilitated the subsequent invasion of the Red Army.

The history of the USSR, between horror and repression, seems to have developed around the strict confidentiality that, in addition to pervade the whole of existence, would appropriately concealed a given constant their budgets by economic '23 to '91: the absolute primacy of the expenditure on armaments. So you learned, not thanks to glasnost, the percentage of gross domestic product of the Soviet Union, for the manufacture and purchase of weapons, has never fallen from World War until his (alleged) death, to below 35% (while the budget of "defense" of the United States stood on the highest positions of 15%, even in times of war in Vietnam).

A first "message of peace" to the people of Earth would, however, Lenin launched in '22 and Stalin in 1927, when the latter, putting into practice the ideas of his predecessor, inaugurated the three five-year plans (1927-1942) that would cause famine in the Soviet Union of the year Twenties and thirties and expenses for armaments led to sometimes

exceed 50% of Soviet GDP. Who trust did not believe these figures, prompting the Russian Wladimir can Rezun, aka Victor Suvorov (former member of the Central Committee of the CPSU, Soviet intelligence officers and exile since 1979, most of the quiet shores), who documents Crenlino Lubyanka and the hand, can prove that is true.

If it is for conspiracy theorists to demonstrate that the role of the Soviet Union was prepared in advance notice in view of the likelihood of future global government, it seems at least plausible to detect the apparent coincidence, and the curious way in which the European political thought, which even boasted a wealth of secular liberal and socialist traditions, was forced to seek new references, to overcome the identity crisis, probably largely due to forfeiture of a system, but not foreign, ultimately, the sudden (and, if you will, generally justified) declaration of illegality of the CPSU and the simultaneous implosion.

USSR, in the final stage of the critical period 1989-'91. By this I mean that the collapse of the Soviet Union, would, among other things, offer clear indications of a change in requirements, that would be necessary to orient the European political class (and Italian, in particular) toward less radical positions, which tend to centrist, more likely to be a electorate, apparently willing to approve the sudden end of tensions between East and West, when this is not tantamount to bear the weight of more and more serious concerns (those arising from international terrorism) and should accept hardships and benefits of the changes that would occur in the financial system-the European Monetary Institute (Eurozone). This would lead to assume that the new European policy framework is not only the result of a compromise, but the effect of a drawing international political standing, tended to rely on the multifunctionality of the Soviet system as a tool of war (provide evidence of the state of fear arising from the looming threat of nuclear war) and as an economic model that would have provided for the establishment of a collectivist society in Europe, has long been used to surrender their national sovereignty and monetary union. From the foregoing it can be assumed that the Rise and Fall of the Soviet Union is evidence, if not the existence of a global plan of something very similar to this, it is true that, in its execution, would be expected: crucial financial support by New York bankers to the Bolshevik revolution in 1917, the constitution of the Soviet Union in 1922, the substantial change in the geopolitical determined by the Second World War, the Soviet Union, have contributed decisive trigger, uninterrupted economic aid to the Soviet Union bestowed by the United States until August 1991.

The Conspiracy

The Jew Myron C. Fagan, former member of the World Zionist Organization, playwright, producer and director in Hollywood during the golden years, in an interview

in 1967 and almost ignored by American media and international, explains how and why the Soviet Union would be born by the will and with the support of the international consortium of banks coordinated by the Rothschild-Rockefeller.

The hypothesis, now widely shared, that would take decisive support from the retrospective authors propose to us, like Anthony Sutton (Wall Street And The Bolshevik Revolution), Benjamin Freedman (-Zionism The Hidden Tyranny), Francis Neilson (The Makers of War), Juri Lina (Under The Sign Of The Scorpion), Gary Allen (None Dare Call It Conspiracy) Carroll Quigley (Tragedy and Hope), in addition to the aforementioned Victor Suvorov (The Icebreaker). The investigations conducted by them to establish with good reason that at the beginning of the last century in financial circles New Yorkers were taken initiatives in order to achieve the political and economic control of a large area of the planet, which would have been justified by Marxist ideals and the regime appropriate to impose them inside as well as to expand them, in view of a company to be established of no class. The realization of this project was directly related to the establishment of the State of Israel, when in full during the First World War, would be determined and carefully planned future exodus, from Central and Eastern Europe, Jews in Palestine (useful references on the subject can be found in the work of Leonid Mlecin entitled: "Why Stalin He created Israel", Moscow 2008)

To understand the reasons, however, the constitution of the Soviet Union and the role it played, necessary, according to Myron Fagan (quoted), back to 1890, the year in which occurs in Tsarist Russia something terrible and unexpected ways that will upset the entire world economy, politics and twentieth Century.

In the closing years of the nineteenth century, an impressive series of "pogroms" upsets Russia. In the cities and the countryside, organized a real hunt for Jews. Teams of Cossacks on horses, who are joined by local commoners, hired for the purpose, to systematically massacre in weeks, thousands of men, women and Jewish children.

The budget is two months after the massacre killing, over ten thousand deaths. The survivors found refuge in centers established with the support of Jacob Schiff, Jew banker, agent of the Rothschilds, who emigrated to New York. He was a Zionist and the founder of the Anti-Defamation League (ADL), he seems driven by feelings of humanitarianism and sets up collection centers for survivors of the pogrom. It actually has the task of forcing them to emigrate to the United States. The order to this effect shall be given by the Leopold Rothschild, that the massacre was also the promoter.

Within a few months preparing the exodus of a million Russian Jews, embarked in the port of Odessa on ships that took the Atlantic routes , to New York. Jewish refugees, newly arrived from Russia in the United States, are immediately granted American

citizenship, provided that their electoral preferences be directed to the Democratic party, so that they can form a secure block of voters who will then send to Congress, the American Jewish Council members.

Second Fagan, the purpose of the pogroms, and guessed it would be obvious reasons, among others, of what later will be called Shoho. The exodus of Russian Jews to North America continued in the first decade of the last century, increasing the number of the democratic bloc, which currently should serve, inter alia, to break the unfortunate rule of the House Republican White House, who since 1897 hampers the desired monetary reform in not just the United States.

The expected moment arrives, thanks to the maneuvers of Paul Warburg, German banker, agent Rothschild, recently naturalized American, who convinces the large group of Germans emigrated to join the Russian-Jewish refugees block to support the Democratic candidate for the Presidency, Woodrow Wilson, who, once elected President, will rush to enact the Aldrich-Vreeland Act, the law establishing the Federal Reserve System.

Meanwhile the First World War broke out, but we're just beginning. At President Wilson assigned more delicate and fundamental tasks, at least three, he will promptly play, at war in Europe to create conditions favorable to the establishment of a system money, successfully tested in the United States. The goal is in the medium term, but for need to get prepared to pursue other, more immediate and congenial to the role prophetic of liberal democracy, which is responsible, politically at least, the broad popular support and enjoyment of the subsequent effects of the "Pax Americana". What it ignores the fact is that the White House is among other things, a place where you hold a special accounts, as we explained in the aforementioned Benjamin Freedman, "The Hidden Tyranny" ie the one related to the debt against the President of the Election Committee, thanks to which he was elected. The head of the White House would almost always be obliged to pay it off in the only currency that a generic group Talmudist, best identified in the World Jewis , will be repaid, and is equivalent precisely to surrender autonomy and Independence provides that the role of President. Woodrow Wilson in practice should take policy decisions of great international significance, following the indications of that group Talmudist, represented by two characters, less well-known in political circles of the time, but very influential Colonel Edward Mandel House, (formerly of cotton related industry Rothschild and those imposed as an adviser to U.S. President) and the Attorney Samuel Untermyer, a millionaire Jew and a member of the powerful New York law firm, Untermyer-Guggenheim-Marshall, in fierce competition with the Sullivan & Cromwell Foster and Allen Dulles brothers anti- Semites.

Mandell House and Untermyer will have the task of suggesting to the President of the decisions that he will have to take that in detail are the following: to ensure that Congress approves declaration of war on Germany by the United States (April 1917),

facilitating operation funding of 20 million dollars in gold in favor of the Bolshevik revolutionary (Operation ordered by Jacob Schiff, in close collaboration with the House of Rothschild, which in turn, drives the system of international banks), encourage in every way the maneuvers required by the Secret London Agreement of '16, including those promoted by Lord Walter Rothschild, in relation to the establishment of a Jewish state in Palestine, and called in the Declaration of the Minister of British Foreign Secretary, Lord Arthur Balfour (November 2, 1917).

It does not seem the least!

But the best is yet to come. The two characters described above lead the delegation of States United to the Paris Peace Conference in 1919 and sketched the mess of Versailles, for the which President Wilson will be held in future historical memory; occasion require the latter to proclaim the establishment of an international body to protect the peace, the Company Nations based in Geneva (then also called League of Nations), and arbitrarily define the borders of Europe, namely by applying criteria that will prepare for war. Lloyd George and Daladier cheer the announcement of the death sentence of eternal enemy, Germany, doubly betrayed and hurt, because it was Germany that offered since 1916 Repeatedly peace to Great Britain and France, with nothing to claim. Italy feels no remorse and mourns its fallen, though, much to the chagrin of the King, should be considered a victim of deception

(The Treaty of London is not recognized by Woodrow Wilson) and the debts of Savoy House Rothschild. Britain, though victorious in war, will soon see the ill-fated coincidence of the irreversible process of decay, and economic policy, which would be involved with the loss of one of its best customers in the market of international trade: the Germany of the Kaiser.

The Talmudist Group, promoted through the Federal Reserve Bank of New York plans Dawes and Young for the payment of war reparations imposed on Germany, where rampant inflation on a straight-hyperbolic and dozes the Weimar government, inattentive to the continuous predation of the assets of the German public by Wall Street, which speculates greedily Reichbank capital, wholly owned by private individuals.

In Italy, many complain, celebrating the victory mutilated. Among these, someone decides to be spokesman of the people, tired of withstanding horrors and misfortunes of war, hunger and deprivation, with the burden of uncertainty in its future. In Russia there is the first effect of the revolution Bolshevik and Soviet collective economy: three million deaths, the provisional budget famine of 1921/23.

ANTI-SEMITISM OF HENRY FORD

In June 1919, Henry Ford, American automobile magnate, promotes

media campaign aimed at demonstrating that the deterioration of the monetary system of the United States would be determined by the political maneuvering of the Jewish Finance, guilty, according to Ford, have caused, among other things, the outbreak of the First World War.

To this end, the well-known industrialist got the "Dearborn Independent", the conservative Weekly Michigan, on which he published a series of articles, who is credited with the authorship, entitled: "The International Jew: The World Foremost Problem." Ford decides, on the occasion, to make the public domain a large part of the "Protocols of the Elders of Zion." The "Dearborn Independent", record, after the first publication, a surprising increase in sales (900,000 copies, a figure remarkable for a period of province), also showing a particular interest because readers for the development of the libel trial in the press, immediately promoted by Anti-Defamation League and the managing director of Ford's Weekly. The case makes a stir, the popularity of Ford and the subject matter, not only in the United States, but also in Europe and particularly in Germany. The articles published on the "Dearborn" with the signature of Henry Ford, are soon translated into German, and form the content of a book, "Der Jude International – Ein Weltproblem", published in Leipzig in 1922 by Sammer-Berlage, who will become loyal" companion "of Adolf Hitler. During his stay in Landsberg Prison in 1924, the future Chancellor and Fuhrer of Nazi Germany will examine each line of the book; this is his inspiration for writing of Mein Kampf. The "Dearborn Independent" will be short-lived, however. In 1927 a decree of the court of Henry Ford in Michigan will force close the week and said he would deny what in the articles attributed to him, also considering the massive reaction of the "Times" of London and large the American press, notoriously under the control of the World Jewish Congress. Enough remember, about the influence that the book would have exerted on Adolf Hitler and Nazism, a contribution by the Fuhrer of Germany of the Grand Cross of the Eagle Henry Ford in July 1938, on the occasion of 75 anniversary of the American industrialist.

The story, once interpreted according to different logics, would have created serious embarrassment in official historiography, inclined to regard it worthy of a rapid storage and not suitable of a clear representations of the American democratic liberalism, which even then were setting up. Less hasty conclusions would be reached by who had intended to take Ford Semitism useful to clarify a secular doubt, if that is anti-Semitism it was just mean a general and unconditional hostility to a people and a race, or a justified criticism of the work of the financial elite.

This reasonable distinction would avoid big misunderstandings, if the League Anti-Defamation had not had an interest in imposing the classic gag to a periodic province that had published news is not true and likely to be unexplained denial. It would perhaps even helped to avert massive tragedies, if the Jewish community had not

been forced to become an instrument of power and ultimately the same, and if Hitler had not Untermyer committed gross and unforgivable mistake of involving innocent people. It is worth remembering that remained in force in Germany, far beyond the rise of Hitler, the law of Emancipation of 1822 that gave the Jews the same rights as citizens of Germanic Germans.

The World Jewish Congress declares war on Nazi Germany

According to Benjamin Freedman, Untermyer would have made player in 1933, a spectacular anti-German campaign (Which he himself had promoted on behalf of the World Jewish Congress, taking task similar to that carried out in 1916) led shortly thereafter (April 1933) in the statement of holy war (a boycott of goods and German products) against the independent "Barter economy" that Nazi Germany was about to be taken. The declaration of war was motivated by an alleged abusive behavior against the regime of German Jewish community (which is repeatedly denied by the representative bodies of the Jews Germans and the International Red Cross).

An honest analysis of the facts would later allowed, according to Freedman, not only perceive their causes the reaction would then triggered the Nazi anti-Jewish hatred and persecution during itself, but also to clarify the objectives that the Untermeier, Talmudist and the Group, they intended to pursue. In the list, it is perhaps appropriate to survey the main cause Hitler to convert the economy of the Reich war economy (the likely economic disaster caused by boycott could be in other circumstances, a casus belli?). Among other things, the holy war Untermeier would aim to counter the avalanche of U.S. equity capital the German I. G. Farben and its subsidiaries; promote a mass exodus of German Jews. Palestine cause the collapse of German exports, (as part of a plan agreed between France and Britain, who saw the resurgent Germany a dangerous competitor in the the technology, commercial and maritime transport), and finally to prevent other European countries, following the example of the Reich, are released from the constraints of banking, even then claimed by the system of foreign exchange and international currency transactions, imposed from the branch Rockefeller-Rothschild banking group, well represented in the Federal Reserve System.

Although it is conceivable that the Untermyer, the majority shareholder of the Bethlehem Steel Company, (already heavily involved in the first conflict at the entrance of the U.S.) did not intend transforming the economic war as soon as Jewish in a real war, fought on field, planned well in advance to Versailles: that, in the parlance of the secret diplomacy, already had assumed the name of "Polish Trap.
